DEPARTMENT OF IT & CSE – CS

presents

ANNUAL TECHNICAL FEST

INNOTECH'26

Think Big, Build Smart, Act Sustainable

Judge Manual

Department round · Friday 23 and Saturday 24 October 2026

How to sign in, find your room, read each team, save and lock their marks on the InnoTech26 portal. It takes a few minutes to learn, and every screen in this manual is from the portal.

admin.innotech.kiet.edu

Thank you for judging at **InnoTech26**, the institute-level technical fest of KIET, organised by the Department of Information Technology and CSE (Cyber Security). In the **department round**, each room has **two judges** who score every team allotted to it. The top teams of each department go on to the Grand Finale on 30 October 2026.

The names, rooms and teams in the screenshots (Dr. Kavita Rao, G Block · 112, Campus Pulse and others) are examples.

WEBSITE
admin.innotech.kiet.edu
on a laptop, tablet or phone

SIGN IN
Google, @kiet.edu
your official KIET account

YOUR ROOM
Two judges
one from the department, one from another

MARKS
Out of 50
nine marks per team, on the category's rubric

YOUR TIME
Slot + buffer
a timer counts it down; 15 extra minutes by default

YOUR MARKS
Save, then lock
change them with a reason until you lock them

In this manual

1. Before the day
2. Sign in
3. Your room on the portal
4. Before your slot: practice view
5. Your slot, the timer and the buffer
6. Score a team, step by step
7. Review, change and lock your marks
8. How the result is worked out
9. The rubrics
10. On a phone or tablet
11. Problems and answers

1 · BEFORE THE DAY

How judging is set up

Your department coordinator does the set-up. You only need your KIET Google account.

- Your **department coordinator** adds you as a judge with your **official @kiet.edu email** and places you in a room. Every judge signs in with a @kiet.edu Google account.
- Every room has **two judges**: one from the department whose teams are in the room, and one from **another department**. Each judge scores every team in the room on their own.
- You judge in **one room** in the department round. One of the two judges may be named the room's **chair**; the chair settles a tie (see section 8).
- Each room has a **building**, a **room**, often **directions**, a **time slot** and a **buffer**: extra minutes after the slot for you to finish and save your marks. The buffer is **15 minutes** unless your department admin sets another time (at most 60). The portal shows all of this on your page.

The department round timetable

Each department's rooms are judged in one slot. All times are IST. **Your room's own date and time on the portal is what counts**: if the organisers move a slot, the portal shows the new time.

Day	Time	Departments
Friday 23 October 2026	9:30 am – 12:30 pm	CSE(AI), CSE(AIML)
Friday 23 October 2026	1:30 pm – 5:00 pm	CSE, CS
Saturday 24 October 2026	9:30 am – 12:30 pm	IT, CSIT, MBA (KSOM)
Saturday 24 October 2026	1:30 pm – 5:00 pm	EN, EC, ELCE, ME, VLSI, AMIA, KSOP, CSE(DS), CSE(CS), MCA

What you need

- A laptop, tablet or phone with a working internet connection, charged for your whole slot.
- Your **official @kiet.edu Google account**. Signing in once before the day, to check that it works, saves time on the day.

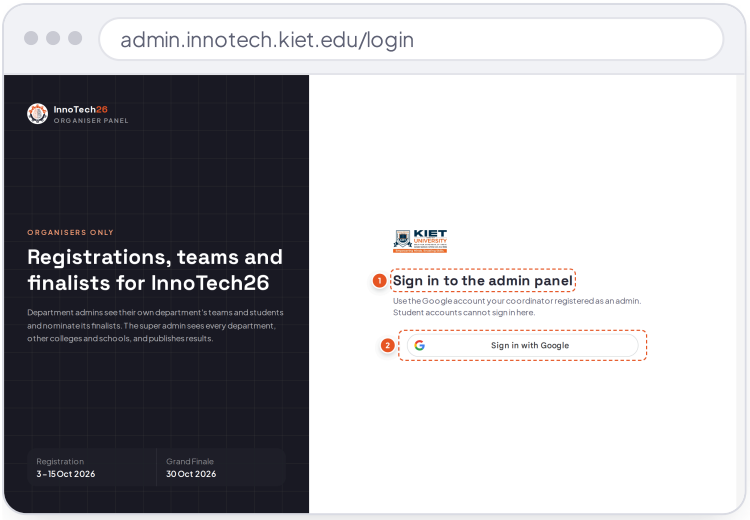

> **What judges see**
>
> You see only the teams of your own room: each team's project title, abstract, members and category. You do not see the other judge's marks, and they do not see yours.

2 · SIGN IN

Sign in with your KIET Google account

Judges and organisers use the same sign-in page.

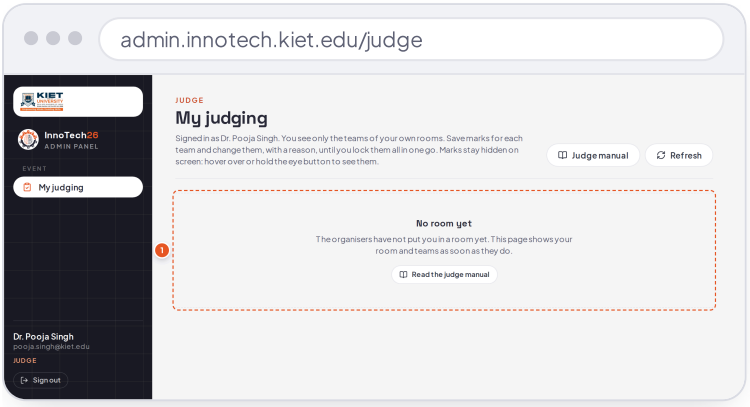

Step 1 Open the admin panel

Go to **admin.innotech.kiet.edu** (not the student website). Click **Sign in with Google** and choose your **official @kiet.edu account**.

1. The admin panel's sign-in page.
2. **Sign in with Google**: choose your @kiet.edu account.

Step 2 You arrive on My judging

After signing in you go straight to **My judging**, your only page. If the organisers have not placed you in a room yet, it says **No room yet**. Your room appears there as soon as they do: click **Refresh** later, or ask your department coordinator.

1. No room yet: you have not been placed in a room.

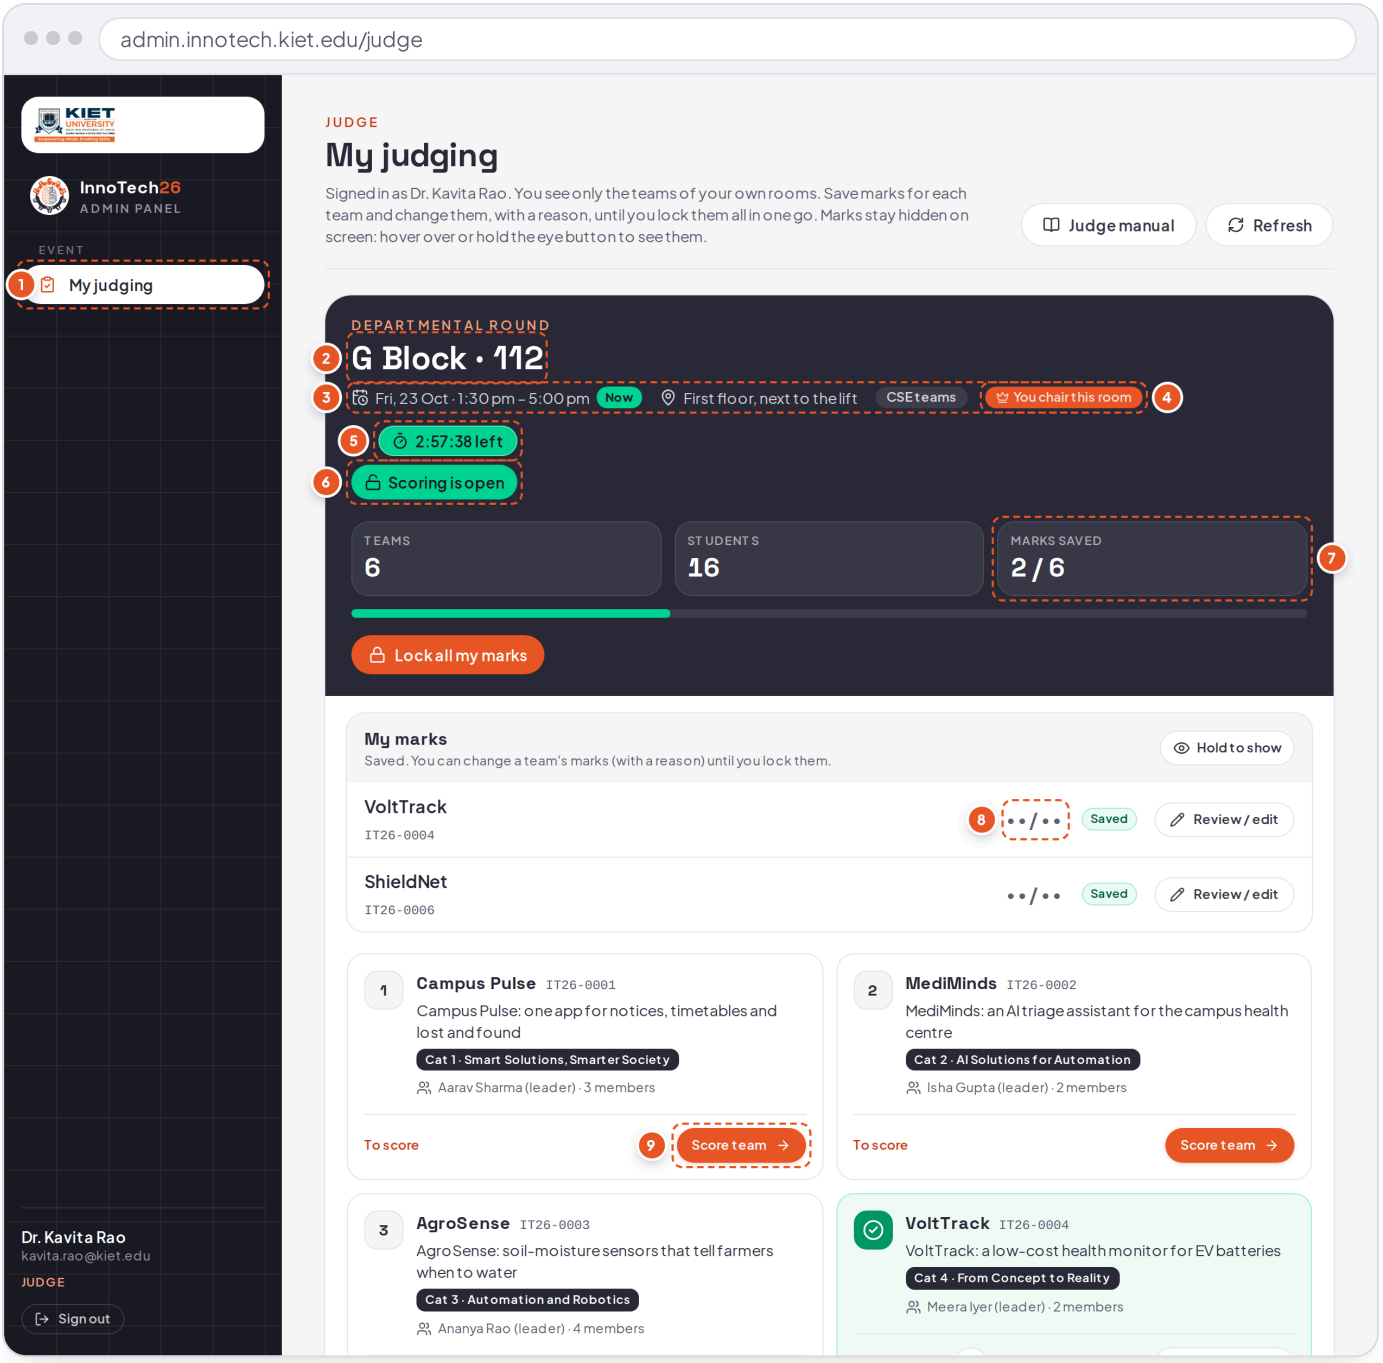

If sign-in is refused

- **This account is not an InnoTech26 organiser or judge.** You signed in with another Google account, or you have not been added yet. Sign in with the @kiet.edu account your coordinator used, or ask them to add you.
- **Sign in with your official KIET Google account.** The account is not the one KIET issued. Use your official KIET Google account.

3 · YOUR ROOM ON THE PORTAL

Everything about your room on one page

The room card shows where and when you judge, the time left, whether scoring is open, and every team in your room.

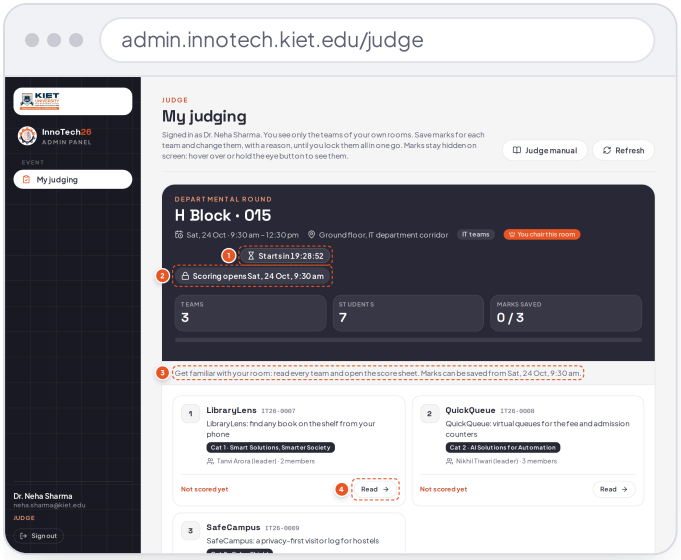

1. **My judging**: your page.
2. Your **room**: building and room.
3. Your **slot** (IST), the **directions**, and the department whose teams you judge. *Now* shows during the slot.
4. **You chair this room**: shown only to the chair.
5. The room's **timer**: the time left in your slot (see section 5).
6. Whether you can **save marks** now (see the table in section 5).
7. **Marks saved**: how many teams you have saved marks for.
8. **My marks**: the teams you have saved, with their totals hidden (see section 7).
9. **Score team** opens a team's score sheet.

4 · BEFORE YOUR SLOT

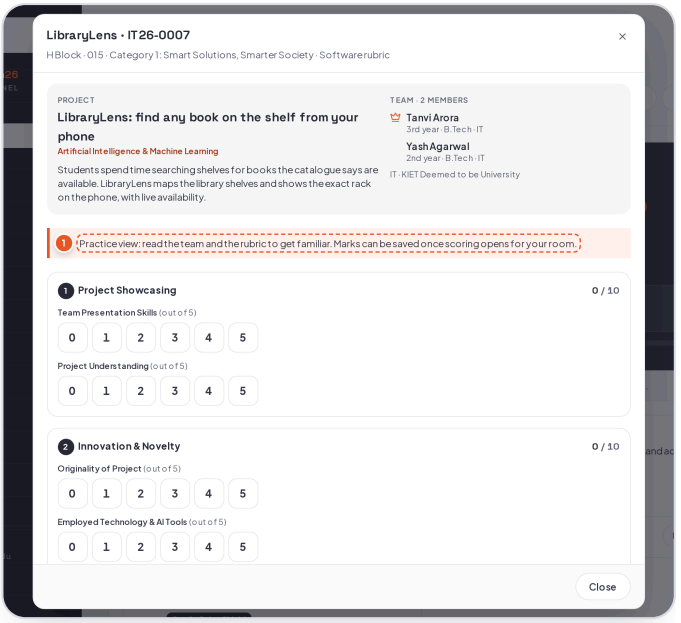

Practice view: read now, score later

You can sign in any time after you are placed in a room, and prepare before your slot.

Before your slot starts, the timer counts down to it and the room shows when scoring opens. Until then you are in the **practice view**: open each team with **Read** to see its project and the rubric you will score it on. The mark buttons switch on when your slot starts.

1. **Starts in**: the time to the start of your slot.
2. When scoring opens for your room.
3. Until then you are in the **practice view**.
4. **Read** opens a team and its score sheet.

1. Practice view: read the team and the rubric; marks can be saved once your slot starts.

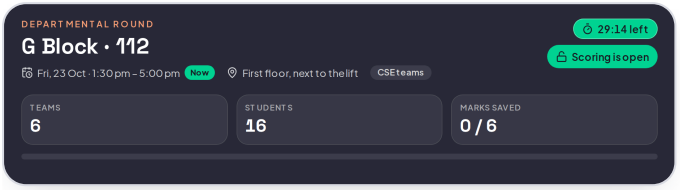

5 · YOUR SLOT, THE TIMER AND THE BUFFER

How much time you have, and what happens at the end

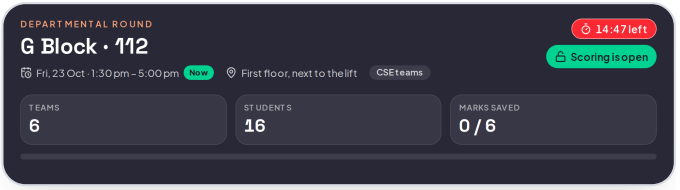

Every room has its own clock. It runs on the portal's time, so a wrong clock on your phone does not matter.

The timer at the top right of your room card shows where you are:

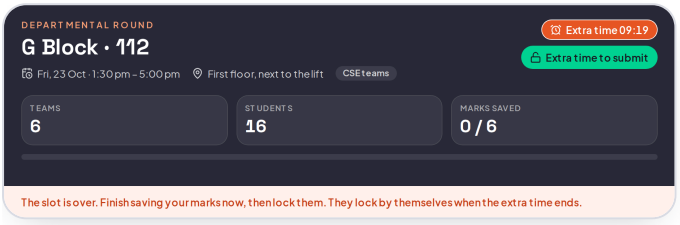

The timer says	The room says	What it means
Starts in 19:28:52	Scoring opens Sat, 24 Oct, 9:30 am	Your slot has not started. Practice view: read the teams.
2:58:07 left	Scoring is open	Your slot is running. Score your teams. The timer turns **red** in the last 15 minutes.
Extra time 09:19	Extra time to submit	The slot is over. This is your **buffer**: finish saving your marks and lock them.
Time over	Time is over: your marks are locked	The buffer has ended. Your saved marks are locked by themselves; you can still read the teams.
(no timer)	Scoring is locked	The organisers have not opened scoring for the department round yet. You can read every team.
(any time)	You locked your marks	You locked all your marks in this room (section 7).

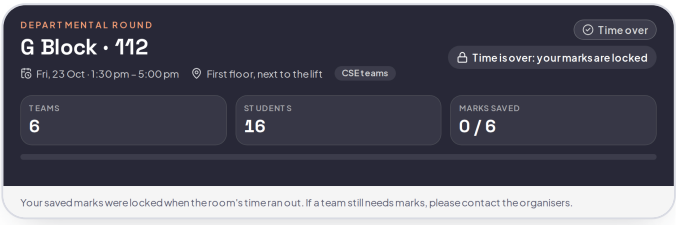

During your slot: the time left.

The last 15 minutes: the timer turns red.

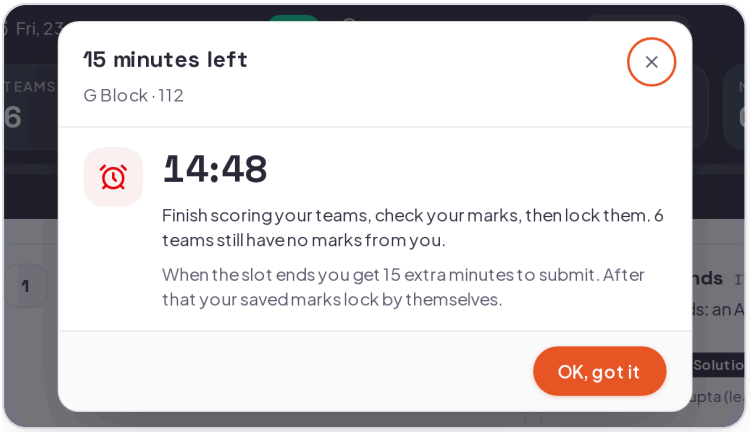

After the slot: extra time (the buffer) to submit.

When the buffer ends: your saved marks lock.

The “15 minutes left” popup

When 15 minutes of your slot are left, a popup tells you how many teams still have no marks from you. Click **OK, got it** to carry on. It appears once.

Use the time left to finish, check your marks and **lock them**. After the slot you have the buffer, and then the room closes.

Why a buffer?
A slot can overrun by a few minutes when a team is still answering questions. The buffer gives you extra time after the slot to enter and check your marks. It is **15 minutes** unless your department admin changes it for your room (from none to 60 minutes). The portal always shows the extra time it gives you.

6 · SCORE A TEAM

Score a team, step by step

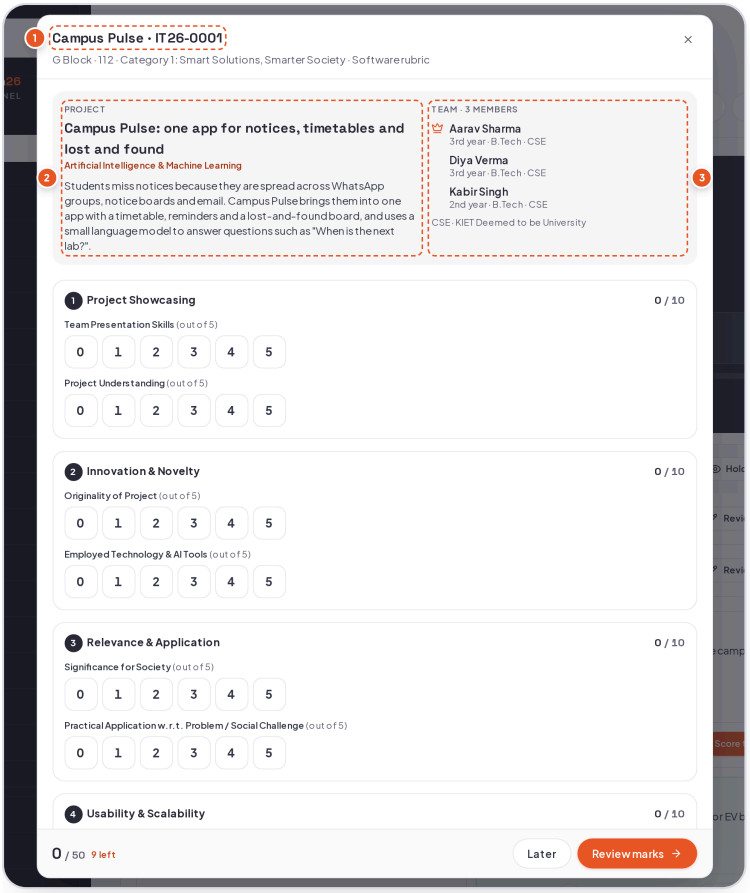

Listen to the team, ask your questions, then give your marks on the portal.

Step 1 Open the team

When your room shows **Scoring is open**, click **Score team** on the team presenting to you (button 9 on the screen in section 3). You can score the teams in any order. A team card tells you where you stand with it:

The team card says	What it means
Not scored yet · Read	Scoring is not open for your room yet. You can read the team.
To score · Score team	Scoring is open and you have not saved marks for this team.
Saved ●● · Review / edit	Your marks are saved. They are hidden as ●● (see section 7). You can change them until you lock. *Changed 2×* shows how often the saved marks were changed.
Locked ●● · View	Your marks are locked. You can look at them but not change them.
A red **withdrawn** or **disqualified** label	The team is out of the event and is not scored.

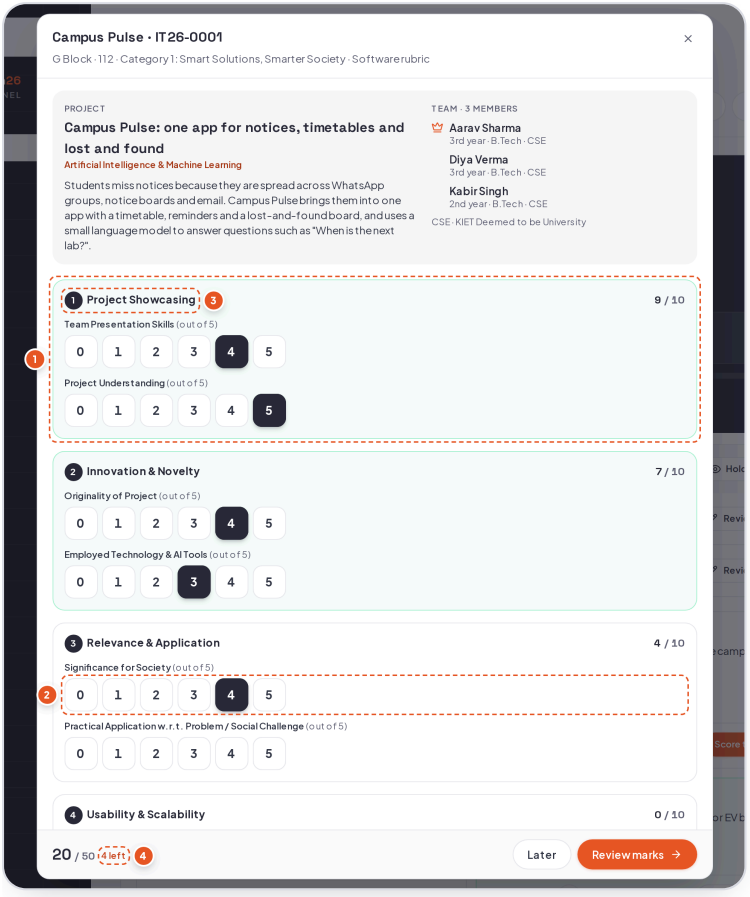

Step 2 Read the team

The top of the score sheet shows the team, its category and the rubric used, the **project title and abstract**, and the **members** (the crown marks the leader). Click **Read the whole abstract** if it is long.

1. Team name and code, room, category, rubric.
2. Project title, domain and abstract.
3. Team members: year, course and department.

Step 3 Give your marks

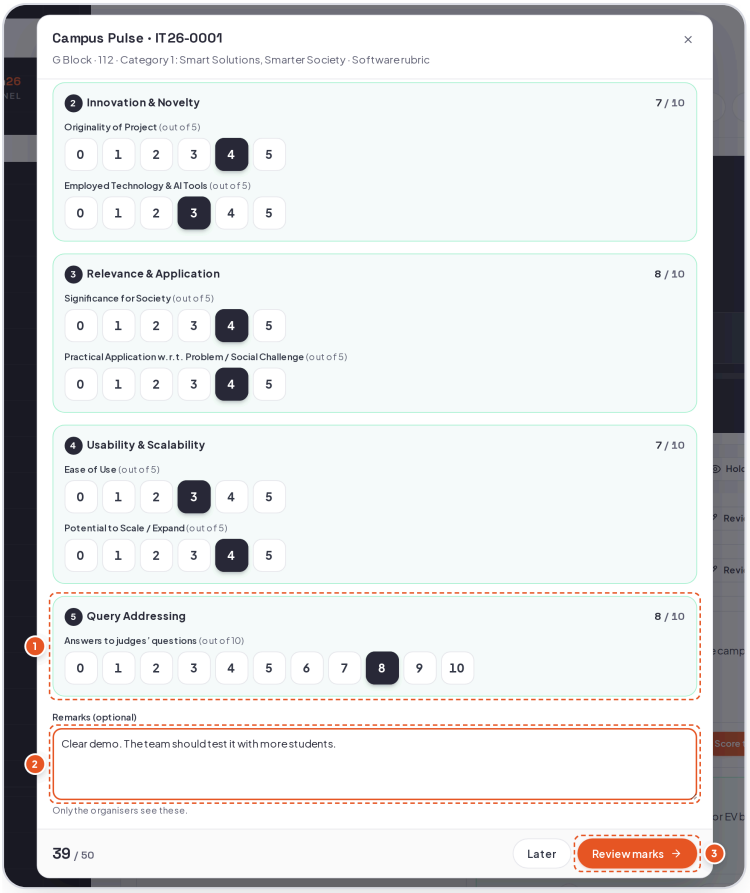

The rubric has **five criteria**. Each of the first four has **two parts of 5 marks**; **Query Addressing** is **one mark out of 10**. That is nine marks, **50 in all**.

Tap a number to give a mark; tap another number to change it. A criterion turns green once both its parts have a mark.

1. A criterion with its two parts (out of 5 each).
2. Tap a number to give a mark.
3. The criterion's subtotal (out of 10).
4. Your running total, and how many marks are still to give.

Step 4 Query Addressing, remarks, then review

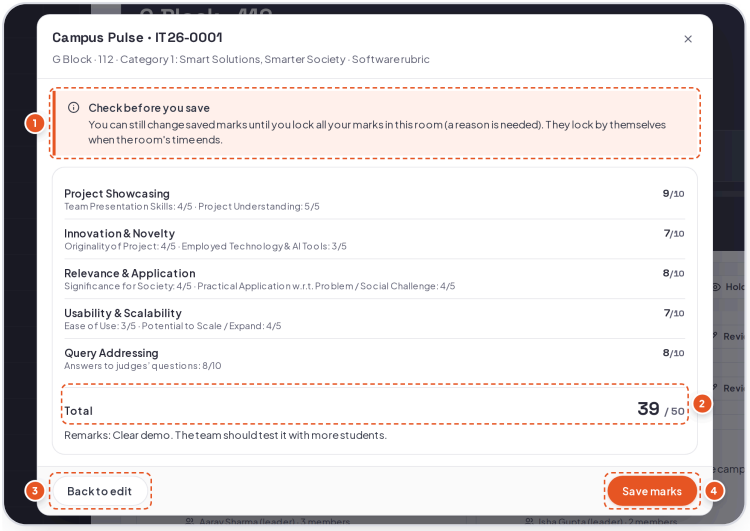

Give **Query Addressing** (out of 10) for how well the team answered your questions. **Remarks** are optional and only the organisers see them. Then click **Review marks**.

1. Query Addressing: one mark out of 10.
2. Remarks (optional): organisers only.
3. **Review marks**: check before you save.

Need to stop half-way?

Later closes the sheet and keeps your marks while this page stays open. Reloading the page or signing out loses marks that are not saved yet.

Step 5 Check and save

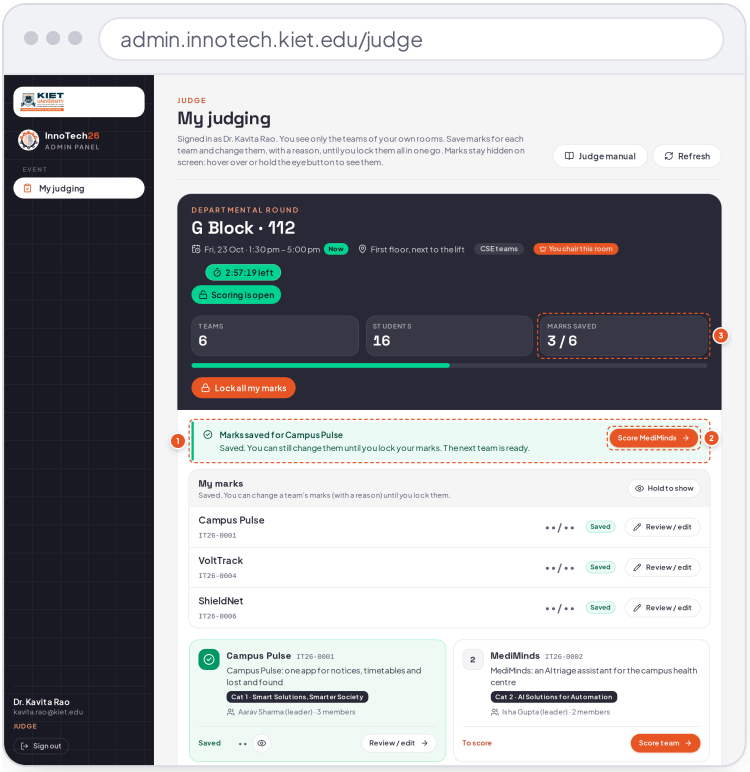

The review shows each criterion, your total and your remarks. Click **Back to edit** to change a mark, or **Save marks** when they are right.

1. A check before you save.
2. Your total out of 50.
3. **Back to edit**: change a mark.
4. **Save marks**.

Saved is not final

After **Save marks** you can still change that team's marks, with a reason, until you lock all your marks (section 7) or the time runs out.

Step 6 Go on to the next team

A green message confirms the marks are saved. Its button opens the next team that still needs your marks. When every team has your marks, it says so and reminds you to lock them.

1. Marks saved.
2. Score the next team straight away.
3. Your progress goes up.

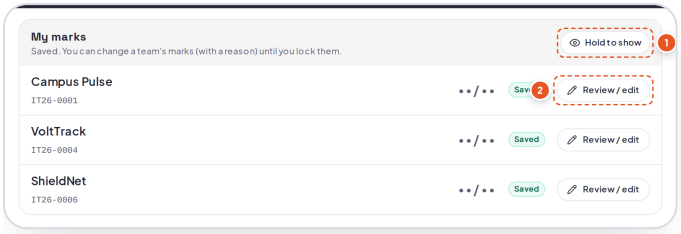

7 · REVIEW, CHANGE AND LOCK YOUR MARKS

Your marks stay hidden on screen, and you finish by locking them

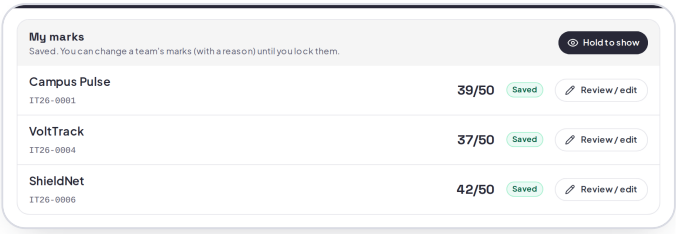

So that nobody standing behind you can read them, saved marks show as ●●.

See all your marks in one place

The **My marks** list on your room card shows every team you have saved, with its status. To see the totals, **hover over the eye button** with the mouse, or **press and hold it** on a touch screen. They hide again when you move away or let go. **Review / edit** opens a team.

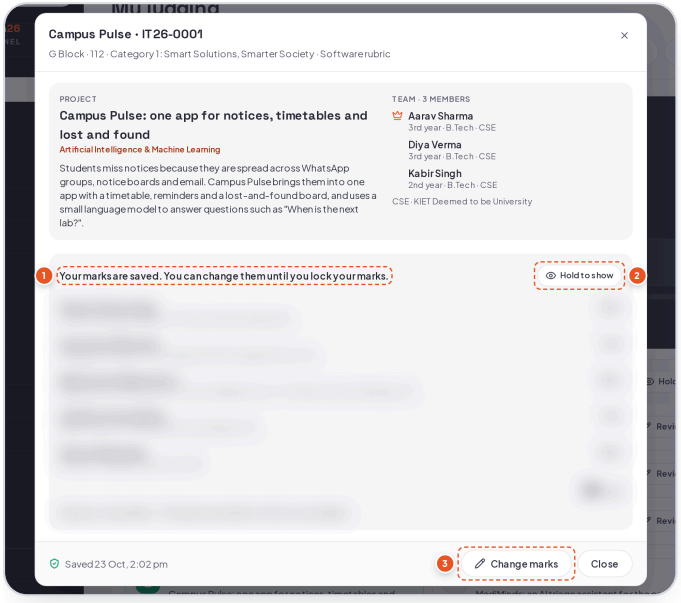

Hidden: ●●. 1 Hover over or hold the eye. 2 Open a team.

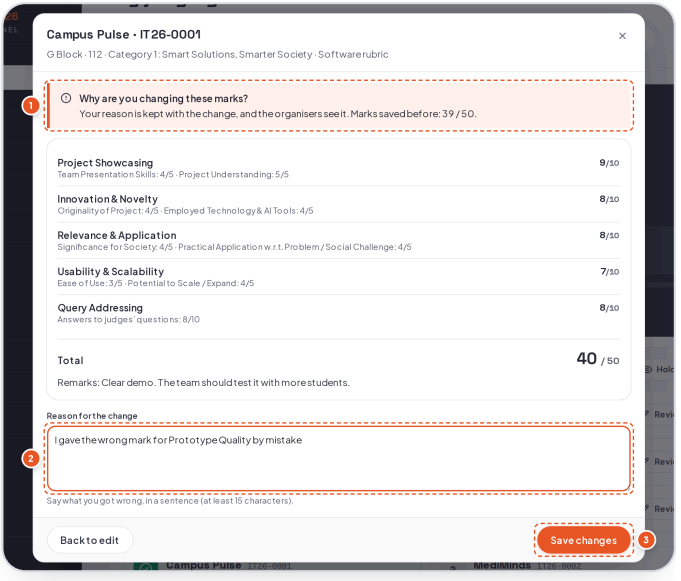

While you hover or hold: your totals.

Change saved marks

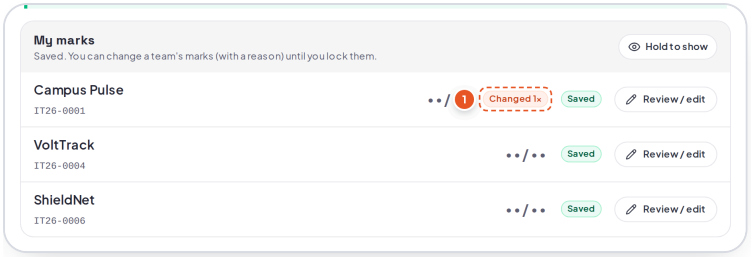

Spotted a mistake? Open the team from **My marks** (or its card). The sheet shows your marks behind **Hold to show**; click **Change marks**, correct them and click **Review marks**. Before they are saved you give a **clear reason**: a sentence that says what was wrong (at least 15 characters; "ok" or repeated letters are refused).

1. Your saved marks, hidden.
2. **Hold to show** them.
3. **Change marks**: only until you lock them.

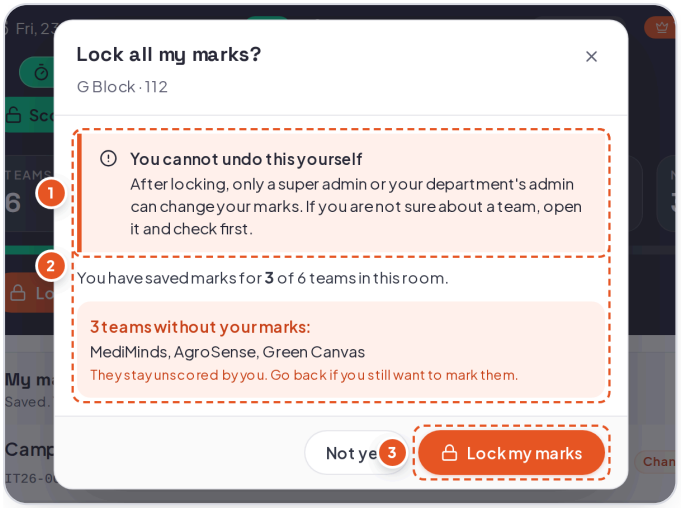

1. The reason is asked for before saving.
2. Your reason, in a sentence.
3. **Save changes**.

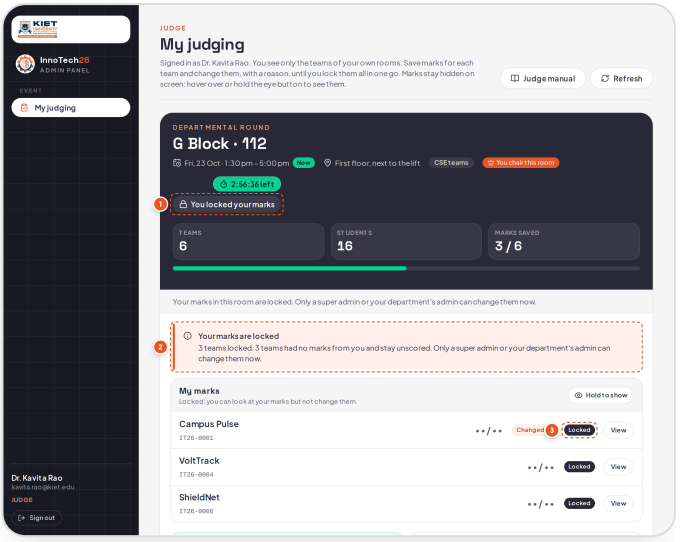

A team whose marks were changed after saving shows **Changed 1×**. The organisers see this, with your reason, highlighted. It is not a penalty: it is the record that makes corrections safe.

When you are done: lock all your marks

When every team you want to mark has your marks and you have checked them, click **Lock all my marks** on the room card. It locks **all your saved marks in the room at once**. There is no locking team by team.

1. After locking you cannot change your marks yourself.
2. How many teams have your marks, and which do not (they stay unscored).
3. **Lock my marks**.

1. The room says **You locked your marks**.
2. A message confirms how many teams were locked.
3. Each saved team now says **Locked**; **View** opens it for reading.

Marks also lock by themselves

You do not have to remember to lock. When your room's time is over (the slot and its buffer), **all your saved marks are locked automatically**. A team you gave no marks to stays unscored. Locking is yours alone: the other judge of your room locks theirs separately.

If you need a change after locking

Ask your **department admin** or a **super admin**. The department admin can change marks, or unlock you so you can change them yourself, only during your room's slot and buffer and with a clear reason. A super admin can do it at any time. Every change is recorded in the activity log with the old marks.

8 · HOW THE RESULT IS WORKED OUT

Average of both judges, then the tie-breakers

The portal works it out. Nobody needs to add up marks by hand.

1. A team's mark is the **average of both judges' totals**, out of 50. A team gets a place only once **both judges of its room** have marks for it.
2. Within each category, teams are ranked by that average.
3. If two teams are level, the higher **innovation / originality** criterion (marked TIE-BREAK 1 in the rubrics) goes first.
4. If they are still level, the higher **Query Addressing** mark goes first.
5. If they are still level, the **room's chair** decides.

Who sees what

You see only your own marks, hidden behind the eye. The organisers see both judges' marks to prepare the results, and any change made after marks were saved, with its reason. Students see only the results the organisers announce, never your marks.

9 · THE RUBRICS

The rubric for each category

Word for word from the Judging Parameters. The portal picks the right rubric for each team.

Software

Categories 1 and 2

Criterion	Parts	Marks
Project Showcasing	Team Presentation Skills (5) · Project Understanding (5)	10
Innovation & Novelty TIE-BREAK 1	Originality of Project (5) · Employed Technology & AI Tools (5)	10
Relevance & Application	Significance for Society (5) · Practical Application w.r.t. Problem / Social Challenge (5)	10
Usability & Scalability	Ease of Use (5) · Potential to Scale / Expand (5)	10
Query Addressing	Answers to judges' questions (10)	10

Hardware

Categories 3 and 4

Criterion	Parts	Marks
Design & Build Quality	Neatness & Safety (5) · Robustness of Hardware (5)	10
Working Model (Innovation & Creativity) TIE-BREAK 1	Originality of Approach (5) · Novel Hardware Integration (5)	10
Technology & AI Integration	Sensors, IoT, Robotics Usage (5) · AI / Automation Potential (5)	10
Future Scope & Impact	Scalability / Commercial Feasibility (5) · Societal / Environmental Relevance (5)	10
Query Addressing	Answers to judges' questions (10)	10

Start-up & Business Ideas (Poster)

Category 5

Criterion	Parts	Marks
Uniqueness of Idea TIE-BREAK 1	Novelty of Concept (5) · Differentiation from Existing Solutions (5)	10
Market Feasibility	Business Model Strength (5) · Target Audience Fit (5)	10
Revenue Generation & Sustainability	Potential to Generate Profit (5) · Long-Term Sustainability (5)	10
Societal / Economic Relevance	Contribution to Society (5) · Contribution to Economy (5)	10
Query Addressing	Answers to judges' questions (10)	10

Gen Z Budding Project Solutions

Category 6

Criterion	Parts	Marks
Concept & Originality TIE-BREAK 1	Originality of Idea (5) · Understanding of the Problem (5)	10
Working Prototype / Demonstration	Functionality of Prototype (5) · Effort & Build Quality (5)	10
Impact Value	Relevance to Society / Environment / SDGs (5) · Potential to Inspire Change (5)	10
Presentation & Teamwork	Clarity of Explanation (5) · Team Coordination (5)	10
Query Addressing	Answers to judges' questions (10)	10

Poster & Models

Category 7

Criterion	Parts	Marks
Concept Innovation TIE-BREAK 1	Originality of Idea (5) · Artistic Appeal & Creativity (5)	10
Impact Value	Relevance to Society / Environment / SDGs (5) · Potential to Inspire Change (5)	10
Message Clarity	Easy to Understand (5) · Logical Flow (5)	10
Visual Design	Neatness & Balance (5) · Artistic Appeal (5)	10
Query Addressing	Answers to judges' questions (10)	10

CyberShield – Secure & Trustworthy Tech

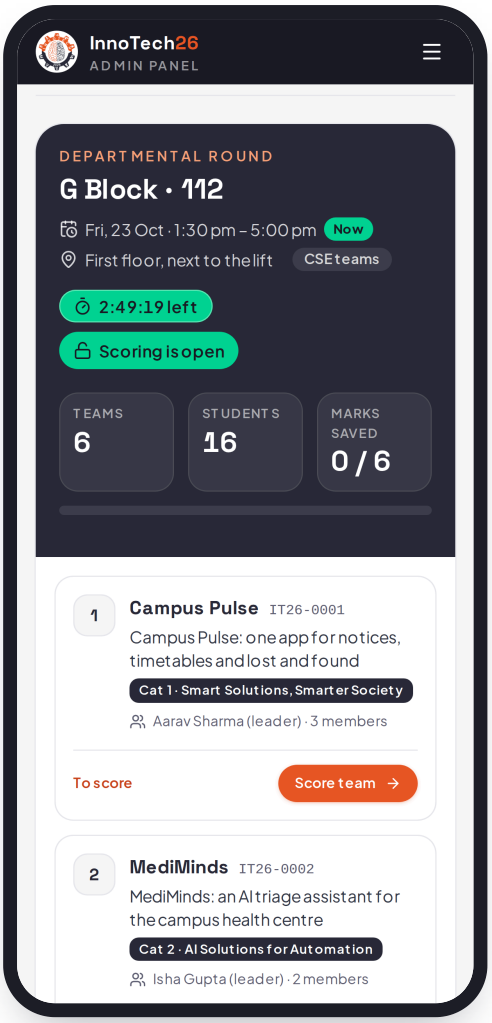

Category 8

Criterion	Parts	Marks
Threat Understanding & Problem Definition	Clarity of Threat Model / Attack Scenario (5) · Real-world Relevance of the Problem (5)	10
Security Design & Innovation TIE-BREAK 1	Originality of Approach (5) · Use of Security Techniques & Tools (5)	10
Implementation & Demonstration	Working Demo (5) · Robustness / Testing against Attacks (5)	10
Impact & Compliance	Societal / Organisational Impact (5) · Privacy, Ethical & Legal Compliance (5)	10
Query Addressing	Answers to judges' questions (10)	10

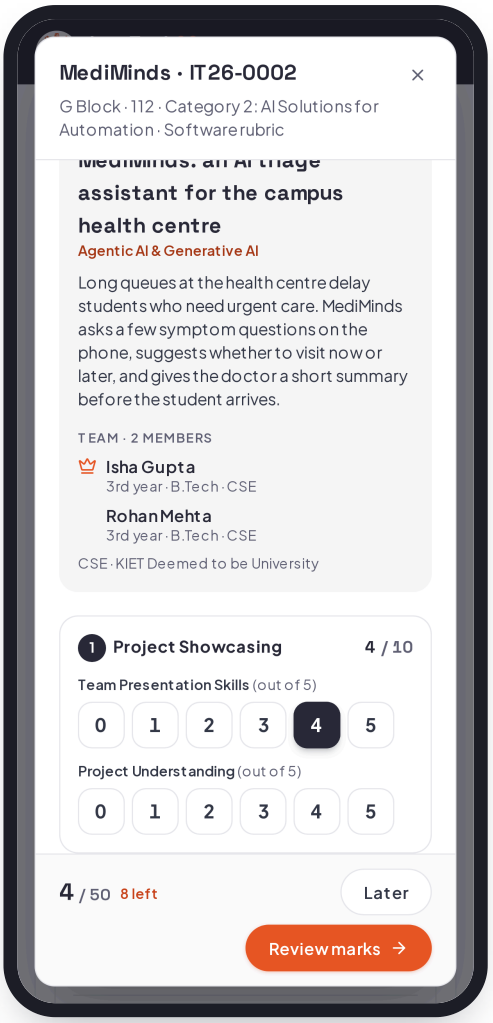

10 · ON A PHONE OR TABLET

The same steps on a small screen

Everything works the same way. On a phone, the menu button (☰) at the top opens the menu, with **Sign out** at its foot.

Your room and teams.

The score sheet: tap a number for each mark.

On a touch screen

To see your hidden marks, **press and hold** the eye button. Let go to hide them again.

11 · PROBLEMS AND ANSWERS

If something does not work

Most problems are solved by the right account or the Refresh button.

Sign-in says `This account is not an InnoTech26 organiser or judge.`

You are signed in with a different Google account, or you have not been added as a judge yet. Sign in with your official @kiet.edu account, or ask your department coordinator to add you.

My page says No room yet.

The organisers have not placed you in a room yet. Click **Refresh** later, or ask your department coordinator. **Refresh** is also the answer whenever the page does not show the latest changes.

The room says `Scoring is locked` **.**

The organisers open scoring for the department round once every room is ready. Until then you can read every team. Click **Refresh** to check again.

The room says Scoring opens with a day and time, and the timer says Starts in.

Your slot has not started. Read the teams and the rubric now; the buttons to save marks switch on when your slot starts.

I gave a wrong mark and have not saved yet.

Tap the right number to change it. On the review step, click **Back to edit**.

I saved a wrong mark.

Open the team (**Review / edit**), click **Change marks**, correct it and give a short, clear reason. You can do this until you lock your marks or the room's time ends.

I locked my marks by mistake, or I need a change after locking.

Ask your department admin or a super admin. The department admin can unlock you or change the marks during your room's slot and buffer; a super admin can do it at any time. Tell them which team and what is wrong.

The popup says 15 minutes left.

Finish scoring your teams, check your marks and lock them. After the slot you still have the buffer; after that your marks lock by themselves.

The timer says Time over but a team still needs my marks.

Your marks are locked and scoring has closed for your room. Contact the organisers or your department admin. They can enter the marks for you or give you more time.

A team did not come to present.

Do not save marks for it. Tell your department coordinator. When you lock, it stays unscored. A team with a red **withdrawn** or **disqualified** label is out of the event and is not scored: nothing to do.

The internet dropped while I was scoring.

Do not reload the page: the marks you have given stay in the score sheet while the page is open. When the connection is back, click **Save marks** again. If you see an error, the marks were not saved; try again.

DEPARTMENT COORDINATOR

Your room and judges

adds you, places you in a room, allots the teams, sets the buffer

ORGANISING TEAM
